REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

None of the prior art references of record, singly or combined, teach or suggest using specific spacer materials as claimed to immobilize a biomolecule to a carbon nanotube surface or a diamond-like carbon film. The Yang article ("DNA-modified nanocrystalline diamond thin films as stable, biologically active substrates") teaches a diamond film and a DNA attached to the surface of the film via a long-chain unsaturated amine that appears to work as a spacer. However, the Yang article does not teach the specific spacer molecules as claimed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
